Intermediate-Term Fixed Income Benchmark	-3.25	-3.71	-1.99	4.57	-0.08	1.58

Purpose

The purpose of the Intermediate-Term Fixed Income Pool is to provide capital preservation and current income to help meet spending requirements of donor portfolios. The Pool will utilize a passive, cost effective approach with a secondary objective to provide broad exposure to U.S. income markets. The Pool is diversified across U.S. Treasury notes and bonds, corporate bonds, bank loans, mortgage-backed securities, and U.S. Treasury Inflation-Protected Securities. The average effective duration and interest rate risk of the Pool will be commensurate with broad fixed income benchmarks such as the Barclays US Aggregate Bond index.

Short-Term Fixed Income Pool

As of 9/30/2026

Trailing Returns

Short-Term Fix. Inc. Pool & Blended Benchmark	Year To Date	Quarter	1 Year	3 Years Annualized	5 Years Annualized	10 Years Annualized
Short-Term Fixed Income Pool TR	**-0.75**	**-1.47**	**0.52**	**4.48**	**1.42**	**1.81**
Short-Term Fixed Income Benchmark	-0.75	-1.42	0.53	4.53	1.49	1.91

Purpose

The purpose of the Short-Term Fixed Income Pool is to provide capital preservation and current income to help meet spending requirements of donor portfolios. The Pool will utilize a passive, cost effective approach with a secondary objective to provide broad exposure to U.S. income markets. The Pool is diversified across U.S. Treasury notes and bonds, corporate bonds, bank loans, mortgaged-backed securities and U.S. Treasury Inflation-Protected Securities. The Pool will have a lower average effective duration than broad fixed income market benchmarks such as the Barclays U.S. Aggregate Bond Index, hence limiting overall interest rate risk.

Money Market Pool

As of 9/30/2026

Purpose

The purpose of the Money Market Pool is to provide liquidity for participating charitable funds and organizations in funding grant making and payment of fees and administrative costs while providing desired principal stability. The long term investment objective of the Money Market Pool is to seek a competitive market return to preserve and grow the portfolio, provide cash flows to meet charitable needs now and those in the future. As such, the Money Market Pool is highly liquid, which enables donors to access funds for grants in a timely manner. The Money Market Pool invests in bank deposits and obligations of the United States government and its agencies.

Investment Commentary
September 30, 2026

Global financial markets delivered mixed results in the third quarter of 2026, as the collapse of the U.S.-Iran ceasefire reignited an energy price shock and forced a reassessment of the interest rate outlook. Renewed attacks on shipping and energy infrastructure sent crude oil prices higher, reviving inflation concerns that had faded following June's peace framework and prompting the U.S. Federal Reserve ("Fed") to raise short-term interest rates for the first time since 2023. The MSCI All Country World Index returned +1.6% (+13.0% YTD), supported by continued strength in mega-cap technology. In comparison, the Bloomberg U.S. Aggregate Bond Index declined -3.5% (-2.9% YTD) as long-term yields climbed to their highest levels in nearly two decades. Risk appetite narrowed rather than retreated, with capital concentrating in the largest, most profitable companies and moving away from rate-sensitive segments of the market.

Domestic equity markets, as measured by the S&P 500 Index, returned +2.3% for the quarter (+12.8% YTD), though the headline result masked a meaningful deterioration in market breadth. Gains were concentrated among mega-cap technology and communication services companies supported by robust second-quarter earnings. At the same time, the equal-weighted S&P 500 Index declined -1.9%, reversing the broadening trend that defined the first half of the year. Higher interest rates weighed on smaller companies, which tend to be more reliant on external financing, as the Russell 2000 Index fell 7.2% (+13.7% YTD) and the Russell Midcap Index declined 3.0% (+11.8% YTD), surrendering a portion of their strong second-quarter gains. At the sector level, energy (+17.2% Q3, +40.3% YTD) led as the oil rally translated into higher earnings expectations, followed by information technology (+7.2% Q3, +28.4% YTD), where leadership rotated within the AI theme as software companies rebounded from steep first-half losses and semiconductor stocks cooled. Utilities (-12.4% Q3, -5.7% YTD) and industrials (-9.7% Q3, +8.5% YTD) were the primary laggards, pressured by higher discount rates and a pause in the AI infrastructure trade that lifted power and electrical equipment companies earlier in the year.

International equity markets trailed their U.S. counterparts during the quarter, as higher energy costs, softer relative earnings momentum, and a firmer U.S. dollar late in the period offset the support of attractive relative valuations. Developed international equities, as measured by the MSCI EAFE Index, returned +0.8% (+10.3% YTD) as energy-importing economies in Europe and Asia were exposed to the renewed rise in oil prices and the inflationary pressure it placed on consumers and central banks. Emerging market equities, as measured by the MSCI Emerging Markets Index, declined 0.4% but remain the strongest-performing major equity region year-to-date (+23.4%). The cooling of AI hardware enthusiasm weighed on the North Asian semiconductor and technology manufacturers that drove the region's second-quarter advance. At the same time, the U.S. dollar's +2.0% gain in September reduced returns for dollar-based investors.

Fixed income markets declined during the quarter as the Fed shifted from an extended pause to renewed tightening. At its September meeting, the Fed raised the federal funds target range by 0.25% to 3.75%-4.00%, citing persistently elevated inflation alongside solid economic growth, and updated projections indicated one additional increase before year-end. The 10-year U.S. Treasury yield rose from 4.4% at the end of June to 5.3% at quarter-end, its highest level since 2007, as investors demanded greater compensation for inflation risk and heavy government and corporate issuance competed for capital. Duration was the primary driver of returns, with the Bloomberg U.S. Aggregate Bond Index returning -3.5% and long-dated Treasuries, as measured by the Bloomberg US Treasury 10+ Year Index, declining -7.8%. Credit proved more stable than rates, as the Bloomberg High Yield Corporate Bond Index fell a more modest -1.8% (+0.1% YTD) given its shorter duration and higher income, and floating-rate senior loans advanced +2.0% as coupons reset higher. Municipal bonds were notably weak, with the Bloomberg Municipal Bond Index declining 6.4% (-4.2% YTD) as a longer-duration profile amplified the rise in yields.
